

HAIR REMOVAL: 30 YEAR TIME/COST ANALYSIS

Days Wasted

Money Spent

\$21,600

Waxing

\$7,000

Electrolysis

\$3,600

Shaving

\$1,500

LASER HAIR
REMOVAL

Cost and Time Calculation Methodology

Cost Breakdown

1. Razors: Estimated cost of \$10 per month on razors and shaving cream, totaling \$3,600 over 30 years.
2. Waxing: Monthly waxing sessions costing \$60 each, totaling \$21,600 over 30 years.
3. Electrolysis: Average cost of a full course of treatment is \$5,000 with additional maintenance costs, totaling \$7,000 over 30 years.
4. Laser Hair Removal: Six treatments per area starting at \$95 per session, totaling between \$570-\$1500 per area.

Time Breakdown (Over 30 Years)

1. Shaving: Estimated at 10 minutes per session, every other day, totaling approximately 228 days.
2. Waxing: Monthly 1-hour sessions, totaling approximately 15 days.
3. Electrolysis: Initial 30 sessions plus maintenance (6 sessions per year), totaling approximately 8.75 days.
4. Laser Hair Removal: Six 30-minute sessions per area, totaling approximately 1 day.

These calculations are based on typical costs and time commitments for each method, providing a general comparison of lifetime expenses and time savings.
